EDITOR’S MESSAGE

Grooming future leaders of a globalized world

As the world becomes increasingly globalized, its citizens will also need to broaden their perspective and knowledge, be able to interact effectively with people of different backgrounds, and be creative and independent problem solvers.

The growing popularity of international schools is a direct result of parents’ general dissatisfaction with the mainstream education system which has not kept abreast of global megatrends. The traditional predominance of rote learning over reasoning and imagination, and the misplaced emphasis on examination results have combined to create a steady exodus of students to other trailblazing schools that offer a more liberal education.

Many students in the mainstream education system dread school because of the totally unjustifiable load of homework that they must finish every night, robbing them of time to develop their interests outside text books, and the precious opportunities of bonding with parents and siblings.

Term breaks and vacations do not bring relief as assignments would multiply from each and every subject teacher.

International schools offer a welcome alternative, and are increasingly held in high regard by parents because of their innovative curriculum and well-researched teaching methodology. While traditional schools focus on dishing out information en masse in order to complete a demanding syllabus, international schools encourage and support students to seek the knowledge and answers for themselves.

The holistic education is effective in nurturing children to become intelligent, all-rounded whole persons who can realize their full potentials. Furthermore, their students are better prepared to pursue education overseas due to their language proficiency, confidence and independent qualities.

The big debate in early childhood education today is the ‘push down’ of academics, robbing children of play. Many professionals are concerned about what this means for young children, and for the future of society as children grow up without the vital learning self-initiated play provides them.

In Hong Kong, there can be a tendency to over-fill young children’s schedules with formal, planned lessons to provide children with more learning. However, professionals, such as Peter Gray, suggest we must do the opposite. Supporting and encouraging children’s inborn drive to play and explore gives them the most valuable skills in living and learning. These are valued skills and ideas. They are consistently fostered through allowing children opportunities to build their confidence and creativity as they become risk takers and problem solvers. In this ever-changing world, these skills cannot be learned by memorized answer, but are truly fostered through allowing children to test and try new experiences and ideas. They are consistently strengthening their cognitive thinking as they actively take part in their learning. These are valued skills and even today’s workplaces are not seeing enough self-initiation, critical analyzing or creativity.

Social and emotional skills are also embedded in play. Social skills, with their cues and rules, are explored and experimented with as they engage with peers and explore cooperation. They investigate their relationships and emotions, giving them time and exposure to develop understanding of social behaviours and norms, as well as insight into their own emotional responses. In imaginary play, they are free to experiment with familiar and unfamiliar characters’ roles. They gain empathy as they explore others’ perspectives. They grow a strong sense of self and belonging as they role play, experimenting with all the knowledge they are gaining socially in their daily lives. They are able to experiment with the unknown, learning to control and understand their impulses and fears.

At Yew Chung International School (YCIS) Early Childhood Education Section, through play, character development is also supported, validated and encouraged. Individual children are valued for their strengths and differences. Too often as adults we forget about the importance of the formation of personality within a child and how it needs to be gently nurtured. When adults provide time for play, they show children that they respect and trust in their natural and authentic desire to learn and question their world. Within play, children have the opportunity to develop positive and secure dispositions, allowing stable character formation and unique personality traits. They gain strong self-identity, which carries on with them throughout life. Children may be “small” but by no means should they ever be made to feel insignificant.

In YCIS early childhood education programmes, all these skills are highly valued through their play-based curriculum. The curriculum is led by the children’s interests, explorations and discoveries. Throughout the classroom, children are researchers engaged in different types of experience, from individual children investigations to small group explorations. Teachers are actively engaged with children, as well as closely observing the various learning on-going of all students. Teachers then creatively extend that learning with further investigations, relevant conversations, and thoughtful settings to deepen children’s play. Teachers respect children’s view, feelings and knowledge. The uninterrupted play is relished by the learners, as they enthusiastically throw themselves into every moment of the school day.

YCIS Early Childhood Education Section plans to open a new campus in Tseung Kwan O in 2019-20. Contact us to learn more.
With a through-school system that allows for students to graduate from Mount Kelly Babies and Toddlers (playgroup) to the International Preschool (Kindergarten), then onwards to the Preparatory School, Mount Kelly offers a learning environment which prepares students for their senior years in College in Hong Kong or in the United Kingdom.

Delivered by experienced educators from the UK, the curriculum at Mount Kelly adopts the best in contemporary educational practices, as well as offering quality opportunities for students to develop their interests.

Committed to the practice of an immersive learning environment, Mount Kelly School Hong Kong incorporates the Chinese language as an integral part of a student's overall knowledge. The school also understands the skills students need for 21st century learning and incorporates coding, robotics and programming into the curriculum.

The school offers an extra-curricular programme including a range of sports, music and performing arts, as well as language learning and mindfulness. These take place as a continuation of the school day, from 3.45pm to 4.30pm, once students have finished their timetabled lessons.

In addition, Mount Kelly School Hong Kong offers a range of overseas learning opportunities for students during the academic year. This includes the opportunity to visit Mount Kelly UK, in which students enjoy a sightseeing day in London before heading to the beautiful countryside in Tavistock, Devon where they join their Mount Kelly UK peers. Students stay at the Boarding House and participate in daily lessons at the UK campus, as well as join the Shackleton programme - designed to develop and celebrate leadership qualities and teamwork.

Furthermore, students at Mount Kelly School Hong Kong will be guaranteed admission to the UK campus should they want to pursue their studies overseas. Alternatively, students who wish to transition to a different College after Preparatory at Mount Kelly will also find themselves fully prepared for the Common Entrance exams and any Scholarship requirements in order to gain entry to many top ranking UK senior schools. Both streams of students can rest assured that the quality education they have received from Mount Kelly will lead to excellent university placements at home and overseas.
Unique and tailored education for students

Shrewsbury International School Hong Kong is a specialist primary school centred around traditional British values and an innovative approach to teaching and learning. It opened in August 2018 and offers a wide range of provision for children aged between three and eleven, predominantly from an international background. The newest member of the Shrewsbury family, the school builds upon the reputation of its sister school, which was founded by Royal Charter in 1552 as one of Britain’s best reputed schools.

Offering balance and breadth, staff at Shrewsbury International School Hong Kong are committed to ensuring that every child is happy, motivated and ready to achieve. A range of specialist facilities designed exclusively for the use of primary aged children ensure that the school is able to engage and inspire. Its proud and committed community are passionate about delivering a legacy in tune with the great successes of their past.

Remarkable benefits of the English National Curriculum

Young children learn best when they are engaged and enthralled. Shrewsbury delivers a topic-based curriculum to immerse students fully within a rich and enveloping series of lessons, considerately designed to best embed key learning concepts. The school’s close connection with the English National Curriculum provides a rigorous structure upon which student performance can be accurately gauged, allowing for helpful school performance comparisons, and improving consistency when reporting to parents.

Shrewsbury welcomes children into a community that pursues both academic success and personal development. Students are given outstanding opportunities to shine in class and beyond. Classrooms and communal areas have been designed to foster partnership and participation, allowing every child to experience and benefit from a unique blend of traditional education values and innovative teaching methodology.

Students are encouraged to explore the ideas, principles and beliefs of others, while developing a refined understanding of their own strengths. With an understanding that children learn as much from one another as they do from their teachers, the provision at Shrewsbury is driven by the benefits of collaboration, fostering academic excellence within a nurturing and stimulating environment and bringing out the best in every child.

Seamless and personalised transition

Staff at Shrewsbury understand that every child is unique and this purposeful clarity has inspired a truly bespoke programme of student transition. Working closely with families, the team help to identify and shape the emerging strengths and ambitions of each student during their primary years. Drawing upon the practice of its sister school in the UK, Shrewsbury will offer a personalised programme of transition that begins with family meetings during the course of Year 4. Gathering together crucial thoughts and ideas at this early stage allows parents to make a careful selection and a considered application. The individual characteristics of each child and the personal circumstances of each family are also be considered to ensure the best possible match. Shrewsbury's detailed knowledge of schools both within Hong Kong and beyond will provide the context required for parents to make an informed decision.

With almost 500 years of heritage, Shrewsbury International School Hong Kong offers a long standing tradition of education excellence and exceptional learning experiences with a world class facility in Tseung Kwan O.

Primary Education without Compromise

With almost 500 years of heritage, Shrewsbury International School Hong Kong offers a long standing tradition of education excellence and exceptional learning experiences with a world class facility in Tseung Kwan O.
The Independent Schools Foundation Academy (The ISF Academy) is a non-profit private independent primary and secondary school providing a unique inquiry-based Putonghua and English bilingual immersion education. We are a Chinese school with a global perspective.

We believe that learning is the active construction of knowledge best experienced through meaningful activities that foster exploration and creativity. An ISF education emphasizes probing discussions, passionate debates, and critical thinking. As cheerful high achievers, ISF learners exude a joy of learning that drives the development of culturally agile and confident communicators who possess the social, creative, analytical thinking skills necessary to succeed and thrive in a complex world.

We are a strong proponent of learning by doing. Our hallmark Experiential Learning Program features unfamiliar settings and novel challenges that build character and confidence. An ISF learner is at home building dormitories in Laos, researching ancient texts in Cambridge, or exploring the rich history of the Silk Road.

We are an accredited International Baccalaureate (IB) World school. Our Diploma results place us in the top tier of Hong Kong IB schools; and more than two thirds of our graduates achieve the coveted Bilingual Diploma, twice the global average. Our graduates receive offers from the world’s most prestigious universities.

Cultivating curious students with the passion to learn

Our systematic and personalized university guidance and careers program spans from Grade 9 to 12 and allows our students to make informed decisions for their DP subject choices and subsequent university applications.

**Small Class Size**

ISF Academy students benefit from small class sizes which range from 5 to 16 students per class. The overall student teacher ratio for all grades is 6:1.

**Bilingual Diploma and Bilingual Theory of Knowledge**

We offer both English and Chinese as first language options (Group 1). Students also receive Theory of Knowledge instruction in both English and Chinese, and may choose either language for their written paper.

University offers received in the last three years include:

- **Canada:** McGill University, The University of British Columbia, University of Toronto
- **Hong Kong:** Hong Kong University of Science and Technology, The Chinese University of Hong Kong, The University of Hong Kong
- **U.K.:** Durham University, Imperial College London, London School of Economics and Political Science, University of Cambridge, University of Oxford, University of St Andrews
- **U.S.A.:** Brown University, Cornell University, Princeton University, Stanford University, University of California, Berkeley, University of California, Los Angeles, University of Pennsylvania

To submit an application or register for a visit, please go to Friends of The ISF at admissions.isf.edu.hk.
HKA is an inclusive non-profit IB World School for 3 - 18 year olds that supports students’ pathways to individual excellence, celebrates diversity, nurtures wellbeing and embraces inclusion.

HKA was founded by two parents with a vision for inclusive, international education and a belief that learning is an exciting endeavour where rigorous engagement is fun. With small class sizes and low student to teacher ratios, the faculty get to know students as individuals and help them discover their own joy as lifelong learners. HKA challenges students to stretch beyond their comfort zones and apply their knowledge in ways that they find both personally and globally relevant.

As an educational leader, they empower learners to pursue pathways to individual excellence by fostering creativity, communication and problem-solving skills. HKA learners develop an evolving understanding of our changing world, leading them to engage in responsible action motivated by their interests, strengths and ongoing reflection. Students of every age are engaged, active inquirers who fully embrace learning in all its forms.

HKA is a non-profit, community school with a Board of Trustees comprised of parents and former parents who generously volunteer their time. Their parents also contribute many hours to enrich school life. Whether it be in the classrooms, the libraries, the theatre or the sports fields, there is always a way to get involved. With a dynamic learning community and weekly on-campus professional development opportunities the faculty are also well supported in expanding their knowledge. At HKA parents are learners too and often attend workshops and learning events led by faculty and guest speakers.

Inclusion is HKA’s byword with their students, faculty and parents quick to welcome you! They believe that diversity, grounded in mutual respect, enhances learning for all. It is a truly international school where no single nationality is a majority with a curriculum that is globally-sourced. Their commitment to inclusion is evident in their classrooms where all students are supported to enable them to follow their own pathways to individual excellence.

This commitment includes students who need extra support and those who benefit from enhanced learning opportunities. In keeping with current research, HKA seeks to enrol a student body where 15% of their students take part in their Learner Support programme. HKA invites you to learn more about their programmes and offerings. Get in touch with their admissions team and see what learning can be!

Setting up students for success

Positioned at the forefront of education, American School Hong Kong (ASHK) designs holistic programs that empower students to be independent critical thinkers and responsible global citizens.

The rigorous American and international education programs offered by ASHK, including a STEAM focus and concept-based approach to teaching and learning, equip students with the skills necessary to become self-actualized, critical-thinking, and problem solvers.

ASHK’s curriculum focuses on academic excellence and is solidly embedded with international standards. Aligned to the US Common Core, and the International Baccalaureate (IB) Diploma Program, the curriculum includes Columbia University’s Teachers College Units of Study (reading and writing) as part of a balanced literacy program. Eureka Math, TCI Science and Social Studies, and the curriculum-based High School and the curriculum-based High School.

In addition, specially designed leadership development programs such as Model United Nations, Week Without Walls, and National History Day, provide students with the opportunity to acquire and develop global citizenship skills.

Building on the academic foundation introduced in the Elementary school, the Middle School also uses the US Common Core (Math and English), Next Generation Science Standards (NGSS), and American Education Reaches Out (AERO) Social Studies standards to provide the framework for learning.

ASHK Middle School

The Middle School (grades 6 - 8) provides a transitional bridge between the more child-centered Elementary School and the curriculum-based High School. Healthy relationships are of paramount importance when working with 10-14 year olds where the widest range of physical, social, and intellectual growth differences exists. ASHK middle school teachers have a strong understanding of adolescent development and through programs such as TAP (Teacher Advisor Program) are able to meet individual needs.

In addition, specially designed leadership development programs such as Model United Nations, Week Without Walls, and National History Day, provide students with the opportunity to acquire and develop global citizenship skills.

ASHK High School

Enrollment in the International Baccalaureate (IB) program is the preferred option for High School students with a pre-IB program in grades 9 & 10 and the full diploma program in grades 11 & 12. The IB Diploma is a college preparatory program characterized by its intellectual rigor, liberal arts tradition, and international flavor. The curriculum promotes critical and analytical thinking. The IB Diploma is recognized as an excellent credential or ‘gold standard’ passport for admission into top tier colleges or universities in English-speaking countries worldwide.

With the flexible and personalized high school program, students can choose between completing a US High School Diploma, the full IB Diploma, or a US High School Diploma which includes some IB classes.

Students will engage in group projects requiring analytical thinking, extensive research and collaboration, whilst continuing to develop their learning through the STEAM approach.

ASHK will provide college counseling and career guidance for students, including support and assistance for students that choose to write the SAT’s. Opportunities to interact with representatives from top US and Canadian universities will also be provided to students.

World-class American School in Hong Kong

American School Hong Kong (ASHK) is a KG to Grade 12 non-profit, college preparatory school offering a holistic American and international education taught by qualified North American teachers who inspire, motivate and challenge students to achieve excellence.

ASHK is operated by Esol Education, the world’s largest operator of international American schools, with 40 years of experience in establishing and operating high standard International schools worldwide. Currently, more than 10,000 students attend Esol’s nine schools across three continents. Graduates from the Esol Education schools are now attending leading universities, including Stanford, MIT, Yale, Columbia and the London School of Economics.

Now accepting applications for KG to Grade 9 (ages 5-14). Join our Open House to discover the ASHK difference. Limited seating, please register early at www.ashk.edu.hk.
Message from the Principal

KIS is a school filled with smiles and laughter. “I want to make our school an ‘oasis in the heart of Hong Kong’ that when you walk in you feel that this is a place where everyone cares,” says Mr. C. Chadwick, Principal.

“I believe that if my students are happy they will want to learn and want to come to school. How will I encourage this? Well, they will be engaged through challenging and interesting teaching. The students will follow a well-structured UK curriculum which the teachers and I will monitor. The curriculum we follow is distinctive and customized for all of our children’s needs, carried out by a team of top-quality professionals from around the world who have chosen to devote their lives to teaching young people how to think and learn.

School History and Curriculum

Korean International School (KIS) started out in 1988. It started its first class in 1994 and today KIS runs two separate curricula, the Korean Section and International Section. The Korean section teaches in Korean, while the international section teaches in English.

At the primary level of the International Section, the core subjects of the curriculum, i.e. Mathematics, Sciences and English, are designed in accordance with the Cambridge International Examinations (CIE), while other subjects are based on the broad curricular outline of the National Curriculum for England. Students have to complete the Cambridge Primary Checkpoint external examinations in the core subjects at the end of Year 6.

Chinese, Spanish and Korean classes are offered as elective subjects. At the secondary level, students continue to take the core subjects plus Art, PE, Information Computer Technology, Korean/Mandarin, and Music, from Year 7 to 9 following the Cambridge Lower Secondary Programme (CLSP)

At the end of Year 9, students will complete the Cambridge Checkpoint external examinations in the core subjects. Years 10 and 11 follow a programme of studies leading to the group award of the International General Certificate of Secondary Education (IGCSE), an international certificate based on a syllabus and examinations developed by Cambridge for students in countries outside of England. In Years 12 & 13, students follow the Cambridge International AS and A2 Level Courses. Year 12 students should complete up to four subjects at the Cambridge International AS Level and select three of the subjects in Year 13 to complete the Cambridge International A2 Level.

A unique feature of KIS is its special unit provision called Springboard. Springboard is a special unit which caters to children and young adults with Special Educational Needs. KIS supports students with a wide range of learning difficulties, constantly striving to empower Springboard students to maximize their potential and where possible, transition into mainstream education for some lessons. All Springboard students have an Individual Education Plan which caters to each student’s needs.

Facilities

The Korean International School is known for its world class facilities. The school embeds technology into its learning using iPads, Crome books, computers and introducing Virtual Reality into its curriculum. The school sport facilities include a 25 meter swimming pool, 2 football pitches, basketball court, tennis court, and sprint track. KIS also has two laboratories, media studios, a Music Room, two art studios, Canteen, Technology center and a brand new state of the art library.
Through character formation, virtue appreciation, and knowledge acquisition

For over 25 years, Christian Alliance International School (CAIS) has focused on its explicit mission: To cultivate learners with knowledge, skills, integrity and discernment; growing in love for God; and service to humanity. Embedded in this mission are three core values: (1) to love God wholeheartedly; (2) to learn diligently; and (3) to serve selflessly. This has been the school’s distinctive mark as it continues to expand into its new campus.

The philosophy of Christian education begins with the fundamental belief that every learner is special, unique and valuable. Therefore, CAIS encourages learners to develop their God-given talents and establish the relationship with God, in order to produce quality academic work while maintaining high standards of conduct.

CAIS believes that Christian education is life-transforming and it prepares learners for a purposeful and fulfilling life. It goes beyond dispensing information and imparting knowledge; Christian education highlights the importance of wisdom, which allows learners to see their situation in a broader context, and assign proper weight to things. When students are confronted with an issue, they have mental heuristics informed through biblical imperatives that enable them to arrive at sound judgments.

A unique distinction of Christian education is that parents have the ultimate responsibilities to educate their children (Deuteronomy 6:7). Hence, the school partners with parents in nurturing, developing and shaping godly character and spiritual values of the young learners. Values that are taught at CAIS will be further reinforced at home, so that learners will be equipped with appropriate socialization skills to function in society.

As a community, not only do CAIS learners explore the Christian way of understanding, but also the Christian way of living. Characterized by the love of Christ, CAIS is a caring, safe, respectful and welcoming community, where members understand differences, celebrate diversity and use their gifts to serve one another. The school is, in essence, a Christ-centered, learner-focused, and others-oriented learning community.

Through character formation, virtue appreciation, and knowledge acquisition

The CAIS academic culture is rigorous, enthusiastic and distinctively Christian. We offer Advanced Placement® courses complement the world class Alberta Curriculum.
"Let children be the Masterpiece that God created them to be" is the vision of United Christian Music Kindergarten (UCM). The first of its kind in Hong Kong, UCM offers a unique holistic education in a state-of-the-art environment.

Their one-of-a-kind educational experience inspires love, confidence, joy, courage, and commitment within young learners. UCM’s holistic approach to education provides a clear pathway for young learners to any local, international, or music school. UCM believes that each child is unique, wonderfully made by God and should be entirely accepted and appreciated.

Music is a lifelong soulmate
UCM believes that children deserve the best possible start in life, and that music is "our lifelong soulmate" (emphasized by the school consultant Dr. Joanna Li). Research from renowned institutions such as Harvard University have illustrated that exposure to music in early childhood can have a potent effect on a child’s academic performance and overall wellbeing. Young learners at UCM begin to appreciate music, practicing at least one instrument early in life. Their exclusive professional, symphonic and systematic music curriculum incorporates four approaches: Eurythmics (Musical Sense), Choral Singing, Music Appreciation and Composition, and Instrumental Learning, giving UCM learners an in-depth and well-rounded foundation in music.

International Curriculum and Curiosity Capturing Environment
UCM offers an incredibly rich learning experience in the setting of an open-plan learning environment. Montessori teaching materials are also used in order to educate young learners through multi-sensory stimulation. Academically, UCM is an international kindergarten incorporating a professional and systematic Music Curriculum, the International Early Years Curriculum (IEYC) and the Biblical Foundation for Early Years Chinese curriculum in a huge learning space that can capture the curious minds of young learners. Additionally, UCM offers a range of advanced technologies so that children learn about the world from modern and relevant perspectives. These include coding design with robotic arms, and Virtual / Augmented Reality kits so that young learners gain a practical framework of how the world functions. This bridges them to the primary school STEAM curriculum as well as prepares learners to tackle future challenges, technological change and innovation.

Parents are the only ones who can choose the best for your children
Fairchild Kindergarten is, in the words of one of our children, ‘that perfect place’ where children come to school every day with a big smile. The Reggio Emilia approach at Fairchild Kindergarten supports children’s learning through an inquiry-based approach in which we cultivate curiosity, creativity and confidence and wonder in each child.

Our thoughtfully designed school provides unique learning spaces and facilities for children to perceive the world, engaging the school environment as the third teacher. Our classrooms ‘bring the outdoors in’ through the use of natural light, wood and open ended resources including sand, water, soil and quality teaching materials to pique children’s interests.

At Fairchild, the development of the whole child in a play-focused environment is central to everything we do. Play has key neurological, cognitive, socio-emotional and physiological benefits for children’s health. A play based, inquiry led approach sets the scene for enjoyable, real learning experiences that really support the children’s healthy growth and development.

The ‘Hundred Languages’ of Children is one aspect of the Reggio Emilia approach, which emphasizes hands-on discovery learning allowing the child to use all their senses and different ‘languages’ to learn and express themselves. As adults, we retain around 80% of what we experience, so providing a variety of rich experiences is so important for children at his young, formative stage, helping to reduce stress and anxiety.

Children are capable of constructing their own learning and are driven by their interests to wonder and understand more. By providing children with a sensory-rich learning environment at our school, using different natural resources, through the creative arts, music and movement, STEM activities, our children achieve academic skills such as reading and numeracy in a much more authentic and meaningful way.

We also provide an immersive language-rich environment for students, as an International school with a diverse community of children. We offer an International Stream as well as Dual Language Stream (in English & Mandarin) to promote bilingualism.

We believe life is a journey and not a race. We encourage children to enjoy their childhood with playful, interesting and age appropriate activities. We hope you will consider Fairchild and our unique learning environment for your child’s journey of discovery through play and natural inquiry at Fairchild Kindergarten in Hong Kong.

For more information about Fairchild and Fairchild’s approach to learning, please visit www.fairchild.edu.hk (Fairchild Kindergarten) and www.fairchild.academy (Fairchild Junior Academy).

At Fairchild, the process of inquiry-based learning through play, is inspired by the Reggio Emilia approach which recognises and values each child’s potential. Our programs cross all areas of early childhood learning including physical, social and emotional development, cognitive and language development, problem-solving and innovating, nature and living.

Fairchild offers International and Dual Language (English & Mandarin) Streams classes for children aged 6 months to 6 years in our two campuses - Fairchild Junior Academy (Playgroup) & Fairchild Kindergarten.

To experience our Reggio Emilia inspired learning environment, contact us to book a school tour or sign up for one of our scheduled Open Houses (Fairchild Junior Academy March 30 | Fairchild Kindergarten March 23) to meet our experienced team.

Application open for 2019/20 - Contact us now!
Only the ‘right’ learning method can ensure students are happy, confident, well-motivated, and enthusiastic about learning.

Founded by Ms Joanna Hotung in 2013, Mills International Preschool is one of the education institutes sponsored by the Hotung family, a prominent pioneer and supporter of quality education in Hong Kong for over 100 years. “At Mills International Preschool, we aim to inspire and develop the global leaders of tomorrow,” says Hotung.

Following the United Kingdom’s Early Years curriculum framework, and teaching in English together with Mandarin, the school offers Playgroup, Pre-nursery (PN), as well as Kindergarten (K1–K3) programs, catering to children aged 6 months to 6 years old.

In Mills International Preschool believes that every child has the right to achieve their full potential. In a supportive, stimulating, and high achieving learning environment, students will learn to challenge themselves, build upon their strengths, and excel in pursuing their passions.

In particular, Mills International Preschool is the only preschool and pre-nursery in Hong Kong that offers the MindUP curriculum, and joins a number of leading ESF and international primary as well as secondary schools, in providing this invaluable addition to the general curriculum.

MindUP curriculum

MindUP is a mindfulness training program devised by The Hawn Foundation in the United States. It provides a set of social, emotional, and self-regulatory strategies to cultivate students’ wellbeing and emotional balance. Basically, students will learn the techniques for focused attention, which will directly boost their happiness and make them more receptive to learning.

One of the objectives of this program is to help students understand, express, and manage the thoughts and feelings that collide in their minds every day. For example, its independent simple breathing strategy helps students regulate their thoughts and emotions, and allows them the mental space needed to maintain healthy minds and bodies, as well as to improve resiliency.

In addition, it is designed to encourage even the youngest students to gain more awareness of how their body and mind are connected. With better control of their reactions and emotions, students will become more capable to concentrate, supported by daily repetition of attentive listening, and regular ‘brain breaks’.

Apart from individual growth, the program also helps improve cognitive, emotional, and social development of students to benefit themselves and others. Students are taught to be kind and have empathy for others, so they can learn to resolve conflicts without aggression, and acquire a greater appreciation for different opinions.

Importantly, students will learn how to name their emotions such as angry, sad, hungry, tired, jealous, happy, bored, frustrated, disappointed, and more, as an effective way to improve their self-expression and self-management skills. Understanding their own feelings can achieve a calming effect and help reduce stress levels.

Stimulating Co-curricular program

Provided by Kids’ Gallery and Star English, the co-curricular program nurtures enquiring minds and reinforce learning. It develops various skills with diverse accredited courses that are worked in partnership with several well-respected and global authorities. Incorporating STEAM (science, technology, engineering, arts, and mathematics), the classes have adopted an interdisciplinary and applied approach. Classes are taught in English or Mandarin.

Mills International Preschool is a division of the KG Group, which has been at the forefront of education in Hong Kong for over 20 years, with graduates receiving offers of admission to some of the most highly regarded international and local primary schools in Hong Kong, including Harrow International School, ESF schools, and Kiangsu & Chekiang Primary School.
Le Club des cinq is a boutique French language school based in Wan Chai, and it prides itself in raising students’ fluency and self-confidence in speaking French. Teachers’ main goal is to raise students’ awareness of their strengths and good qualities, boosting their self-esteem while improving their fluency in the language with individualized teaching methods.

“I started the school because I felt there is a need here for an interactive learning environment,” says Paul Chauvet, Founder and Director. “No matter the age, we have a communicative teaching approach that allows students to understand, speak, read, and write in an environment like home.” The school adopts an approach that bases learning on what interest students at different stages, focusing on project and interest-based learning. This way, genuine connections which reinforce self-esteem can be forged. Students will not only be guided to write exceptional articles, make YouTube videos, and even try out French cooking, immersing themselves in efficient and progressive French learning.

The school offers specific programs for all ages. Classes are limited to five students to allow teachers to provide adequate attention to all students. “We have excellent connections with schools and institutions such as the French International School and the McGill Alumni. We are constantly working with them, developing our school and striving to provide better education for students every year,” says Chauvet.

Partner of French International School
We aim to make learning Spanish exciting and effective for everyone.

“De la mano” means “hand in hand” in Spanish, reflecting this teaching approach: being together with the students during the different phases of learning Spanish, listening to them to understand how they feel about their progress and learning experience.

Our story:
Marta Prieto, mum and Spanish educator, started “De la mano Spanish” to make learning Spanish exciting and effective for everyone. After years of teaching Spanish in International Schools in Hong Kong, Marta has learnt that the most important aspect for students when they are learning a foreign language is that they have to be motivated.

Our methodology:
“De la mano Spanish” is a magical place where you will learn Spanish language through an alternative methodology: PLAYING GAMES. Because the most effective learning is the learning that is transmitted through the game, as endorsed in numerous studies in the field of education.

Benefits of this methodology:
- High levels of motivation towards learning a foreign language
- Reduces dispersion, inactivity and non-comprehension problems
- Fear of making mistakes is eliminated
- Control over the learning process itself
- Greater dedication to learning
- Enables functionality of the learned contents

We offer engaging Spanish language classes to kids and teens in prime locations across Hong Kong Island, Kowloon and New Territories:
- Southern District (One Island South)
- Heng Fa Chuen
- Tseung Kwan O
- Shatin
- Lam Tin

Our teachers:
Carefully selected native Spanish speakers with previous experience in education of Spanish as a foreign language

What are our references?
We have experience in different International Schools and Kindergartens in Hong Kong, and this is what their principals say about us:
- Teachers are professional, efficient and highly organized
- Students are engaged and challenged appropriately
- Students are excited about the task at hand
- Lessons are designed to maximize student learning
- Students are motivated and are keen to learn a new language

Our courses are tailored for each age group (from 3 years to teens) and level.

PLAYGROUP – For Age Group: 3-5
Educational curriculum designed to be the perfect introduction to Spanish learning.

SPANISH FOR KIDS – For Age Group: 6-12
Engaging curriculum designed for primary students, developing the confidence and fluency in the use of Spanish.

SPANISH FOR TEENS – For Age Group: 13-17
Course approach is oriented towards students of secondary education, where Spanish has become an elective subject in Hong Kong curriculum.

PREPARATION FOR SPANISH OFFICIAL EXAMS:
Across the years De la mano Spanish has successfully prepared many students for the main Spanish official exams:
- DELE (16+ years) and DELE FOR YOUNG LEARNERS (9-16 years)
- IGCSE (12-16 years)
- HKDSE (10-18 years)
- IB (16-18)

We believe in learning Spanish “De la mano” – hand in hand! We aim to make learning Spanish exciting and effective for everyone.

After years of teaching Spanish in International Schools in Hong Kong, we have learnt that the most important aspect for students when they are learning a foreign language is that they have to be motivated.

With that in mind, we have developed a teaching approach where communication and interaction with the students are the key factors.

We offer Spanish classes to kids and teens in prime locations across Hong Kong Island, Kowloon and New Territories.

Located in Shum Wan overlooking Aberdeen Harbour, Victoria Shanghai Academy (VSA) is the first through-train IB World School in Hong Kong to offer International Baccalaureate programmes for over 1,800 students from years 1 to 12, including Primary Years Programme, Middle Years Programme and Diploma Programme. With the three programmes, IB aims to foster critical-thinking skills and a sense of international-mindedness in its students.

VSA’s bilingual educational model is underpinned by the IB continuum of programmes. The main features of the IB programmes at VSA include the integration of the best of international and local bilingual education to develop active learners and well-rounded individuals, build strong bilingual foundation in Putonghua and English, as well as embrace international-mindedness and cultural awareness.

The IB Primary Years Programme at VSA is a transdisciplinary programme that focuses on the development of the child holistically in both the classroom and in the world outside, as well as helping students’ to reach their personal and academic potentials. Delivered by two teachers (Western and Chinese) in each classroom, the programme aims to maximize students’ daily learning and use of both English and Putonghua within the classroom.

The IB Middle Years Programme at VSA emphasizes the use of concept-based inquiry learning approach that supports students’ personal and intellectual growth. To equip students as strong bilingual learners, they are allowed up to 40% of curriculum time to focus on their language development. The programme provides a framework of academic challenge that encourages students to embrace and understand the connections between traditional subjects and the real world, becoming critical and reflective thinkers within an inquiry approach to teaching.

The IB Diploma Programme at VSA is an academically challenging and balanced two-year programme that provides breadth and depth of studies to prepare students for further education. While the programme culminates in external examinations, VSA IB Diploma Programme graduates have always achieved impressive results and received offers from prestigious universities around the world. In 2018, the average score is above 36.3, with two perfect scorers of 45 points and two near-perfect 44 points.

In addition to academic success, Creativity, Activity, Service (CAS) are equally important. At VSA, students organize and participate in an array of activities, both locally and globally, through which they develop a greater sense of international mindedness and social responsibility.
The English Schools Foundation is the largest provider of English-medium international education in Hong Kong. For over 50 years, we have been nurturing talent, supporting learners and their families – and preparing young men and women to be the global leaders of tomorrow.

Former students of ESF’s 22 schools can be found in every part of the world. Our size – and our proud history means that our alumni have been shaping the world in which we live for decades.

Our outstanding results are a testament to our outstanding teaching staff – but that is not the whole story. At the heart of our success is our approach to teaching – which starts with our International Baccalaureate Primary Years Programme (PYP).

ESF schools have been following the International Baccalaureate programme for almost 20 years now. In that time, we have evolved teaching from a ‘teacher teaches, pupil listens’ model, to one where every student is an active participant in their own learning.

Walk into any one of our schools and you will see our learners confidently showing the skills that they will need to be a success in the future. They don’t just listen, they question. They don’t just receive information – they analyse it and consider what it means for our world now – and in the future.

Simply put, we want every student to be the very best they can be. Our award winning sports programme regularly brings top level coaches and athletes to our schools – and our Language and Learning syllabus brings art and culture to life.

We live in a globally connected world. At ESF we make sure our student enjoy learning – and get ready to take the lead in whatever field they choose to enter.

You can find out more about ESF and how we are inspiring the global leaders of tomorrow by visiting our website www.esf.edu.hk or by following us on social media.

When I was looking for a school for my elder child, Isabelle, I was inundated with choices. Hong Kong, if nothing, has a whole plethora of international schools for parents to choose. I wanted a school that has a diverse student population, is welcoming of a multicultural expat family, and offers a creative and nurturing educational environment for my child to blossom and grow. Luckily, I have a friend whose child had enrolled in Nord Anglia International School Hong Kong (NAIS), and she told me about the school with experienced teachers, quality curriculum and the happy and confident students. When I visited the campus and talked to the staff and faculty, I left assured that NAIS is the school for my daughter. To date, both my daughters, Isabelle and Victoria, are learning and growing with NAIS.

NAIS offers an excellent curriculum, combined with proven teaching methods that has been praised and approved by many parents and experienced educators. I love the school’s modern teaching method which allows my children to learn more with less homework. The school is teaching relevant skills and providing up to date knowledge to prepare the students for the modern world. Languages, Mathematics and Art are not the usual boring compartmentalised subjects. Instead they are made relevant when intertwined with STEAM topics.

NAIS has a group of highly-qualified teachers and staff who are absolutely heart-warming. They bring out the best in my children – stimulating their minds and increasing their confidence. My elder daughter, Isabelle, is very interested in the arts. She is given plenty of guidance and opportunities to experience and to engage in this subject so that she can discover her own potential. She has been inspired by many artists, authors, and musicians’ workshops organised by the school. My second daughter, Victoria, has improved academically, thanks to her patient teachers and a positive learning environment. Beyond the classrooms, my children get to enjoy an extensive choice of after-school activities and forge closer friendships with their school mates.

NAIS is not just a school. It is a family. The school’s international environment and inclusive culture makes it the best fit for my multicultural family. My children benefit from its diverse community and enjoy learning about world cultures through events in “Global Campus” and the annual International Day. My children always enjoy these special events because they have the chance to introduce their home country and also to experience other cultures.

Parents are not excluded in their children’s educational journey. We are encouraged to volunteer and participate in school activities, so as to better understand the school’s ethos and learning environment. These activities also allow us to forge closer bonds with the faculty and staff, as well as the other NAIS families. For me, volunteering my time during International Day, library reading sessions and community outreach programmes are definitely memorable and are treasured time spent with the NAIS community.

For any parent asking me whether I have made the right choice in choosing Nord Anglia International School for my children, my reply would be a resounding, “Yes!”
