

# Character Builder 您好嗎？

The basic unit of the Chinese language is the *zi* (字), i.e. a Chinese word. Each *zi* has a written form (called a character, made up of strokes), a sound (made up of consonant and vowel) and a meaning (or multiple meanings). When we speak or write Chinese, we string *zi* together to form terms, phrases and sentences.

In Putonghua (the spoken form of Modern Standard Chinese) each *zi* is pronounced in one of four tones:

1<sup>st</sup> tone: 1 = diacritical mark — pitch: 5 to 5, highest prolonged

2<sup>nd</sup> tone: 2 = diacritical mark / pitch: 3 to 5, middle to high

3<sup>rd</sup> tone: 3 = diacritical mark U pitch: 2 to 1 to 4, low to lowest to high

4<sup>th</sup> tone: 4 = diacritical mark \ pitch: 5 to 1, highest to lowest)

To pronounce each *zi* below, follow its pinyin and the given tone number. Light-sound words, which have no definite pitch, carry no diacritical mark and are marked by 0.
