A happy student is testament to educational excellence in international schools

It may come as a surprise to many parents that international school children actually seem to rejoice in attending classes everyday.

It is widely acknowledged that they are generally more lively, joyful, confident, open-minded and warm-hearted because the holistic education they receive not only stand them in good stead for further education, whether locally or overseas, but also expand their horizon and hone their character development.

Parents' general dissatisfaction, disappointment and even exasperation with the mainstream education system is reflected vividly in the growing popularity of international schools where the emphasis is on quality as opposed to quantity in both teaching and learning. While traditional schools concentrate on dishing out information en masse to complete a demanding syllabus, international schools provide the facilities, the environment, and the support for

students, bringing out the best in individuals. Their interdisciplinary approach with a STEAM focus also equips students to face the challenges of the 21st century.

Parents like what they see in their broader curriculum and well-researched teaching methodology, not to mention well-qualified and caring teachers. In addition to academic pursuits, their students are excellent communicators as they come into contact with school mates of different ethnic backgrounds. With no homework pressures, they have the time to develop such invaluable attributes as reasoning power, creativity, problem-solving skills, teamwork, empathy, self-discipline, and more.

This guidebook contains updated information on international schools, and provides answers to questions to help you make the optimum choice for your children.

Inspiring the Next Generation of Innovators: The Genius Workshop Celebrates 20 Years of STEM Excellence

As the world becomes increasingly shaped by technology, preparing children with the skills to thrive in the future has never been more vital. STEM education—covering Science, Technology, Engineering, and Mathematics—is no longer just an academic advantage; it is essential for nurturing creativity, problem-solving, and innovation in the next generation.

For the past 20 years, The Genius Workshop (TGW) has been at the forefront of equipping students aged 3 to 14 with these critical skills. This milestone year marks two decades of commitment to inspiring young learners through hands-on, engaging, and future-ready programs.

Over the years, TGW has proudly partnered with more than 40 prestigious international and local schools across Hong Kong. Many schools have entrusted TGW to mentor and train their Robotics and Drone Coding teams, guiding students to shine in local and international competitions with remarkable results. These partnerships reflect TGW's trusted reputation and proven expertise in STEM education.

TGW's curriculum is also constantly evolving to match the needs of tomorrow. Age-appropriate A.I. learning elements are integrated across its programs, ensuring students gain early exposure to one of the most important technological developments of their generation. From building robots to coding in creative digital platforms, students develop not only technical knowledge but also the mindset to understand and apply emerging technologies in real life.

Among its most popular programs are workshops tailored specifically for primary school students. The Engineering Workshop (ages 5–6) introduces young learners to mechanical concepts through fun and creative building projects. The Robotics Division (ages 7–14) allows students to dive into coding and engineering, preparing them to compete in robotics tournaments. For those who love virtual creativity, Minecraft Coders (ages 7–14) and Roblox Game Dev(ages 8–14)

combine gaming with coding, teaching logic, programming, and digital design in an exciting and relatable way.

This fall, as TGW celebrates its 20th anniversary, parents have an exceptional opportunity to give their children a head start in STEM learning. To mark this special year, TGW is offering a Back To School Promotion: enjoy 10% off all regular programs, plus receive a free LEGO Minecraft Boxset with enrollment. This exclusive offer runs until September 13.

For two decades, The Genius Workshop has empowered thousands of children to become problem-solvers, creators, and future innovators. With its proven track record and passion for inspiring young minds, TGW remains the trusted choice for parents who want their children to thrive in a fast-changing world.

The Impact of AI on Student Learning

AI, no matter you like it or not, is a major technology in our daily lives, e.g. face recognition, autonomous driving, and robotics. How about the impact of AI on student learning? There are two important aspects we need to focus on: (i) educate students and our young generations how to effectively use AI in their learning; (ii) how to use AI to assist educators (teachers, instructors) to facilitate their teaching.

For (i), we hope our students and new generations understand what AI can help them. For examples, AI tutors, ChatGPT-like systems to help them draft a report, correct the grammars, reorganize the structure of an article, and even write computer codes for them. On the other hand, a lot of criticism on using AI to help students learn such as students may not know how to write reports and do analysis on data. However, I have a different view. Depending on how we educate students, AI can effectively produce a draft, however, whether this draft is good and whether the students can learn from this draft and further improve it, this is the job of our educators. We should not resist the new generation to use new technology, but how to guide them to learn using this new technology is a major issue. Plus there is an important issue on ethics. How to teach our students and new generations using new technology in an ethical manner (like the recent news of using deepfake to create fake sexual pictures for classmates) is also an important topic we, educators, need to pay attention to.

For (ii), there have been tremendous improvement on using AI to help teachers and educators to teach. Let me name a few examples. (a) automatic grading of answers: it took a lot

of resources for teachers to grade and follow the logics of mathematical questions, to grade and understand articles written by students, and to follow reports from scientific experiments in physics, chemistry, and biology, also for course works related to social science and public affairs. The advancement in AI now allows us to do automatic grading on all the above in a relatively easier way. Of course, we still need our professional educators to safe-guide the outcome from AI grading as no AI systems are 100% perfect. Another good points of using AI in education is that data analysis can be done automatically and more personalized. AI systems can be used to identify the weakness of students in every subject and can also automatically provide more help and generate questions to strengthen the students to overcome their weaknesses.

Overall speaking, personally, I think that we need to leverage the power of AI in education. On the other hand, we need to guide the students how to use AI effectively and ethically to fully utilize the technology while enhancing the learning and teaching experience of both students and teachers.

The Importance of Mental and Emotional Well-being for Happy Learning

By Dr. Wilbert LAW (Educational Psychologist, Chairperson) &
Mr. Vergo CHENG (Educational Psychologist, PR Convenor)
Representing Division of Educational Psychology, Hong Kong Psychological Society

It is important to reflect on what truly makes learning joyful and meaningful for our children. In today's fast-paced, achievement-driven world, learning often ties exclusively to academic scores, rankings, and awards. Yet, in its purest form, learning is a process full of curiosity, discovery, and growth.

Many parents feel pressurized to push their children to study, afraid that their children might fall behind if not so. Similarly, teachers, under the pressure of completing school curricula or preparing students for tests and examinations, need to focus heavily on subject knowledge. In doing so, this will shift children's learning motivation from intrinsic interests, to external pressure such as competition amongst peers or fulfilling others' expectation. Moreover, we might risk the beauty of learning being missed out: the joy of discovery, the excitement of engaging with new ideas, and the personal connection between a learner and the person sharing that knowledge.

What we often overlook is that mental and emotional well-being plays a critical role in a child's ability to learn independently and happily. A well-supported child, who is emotionally stable, socially secure, and mentally resilient, is far more likely to become a lifelong learner than one driven by fear or pressure.

Creating a learning environment that prioritizes emotional wellness means going beyond meeting academic objectives. It means giving learners a space where they can ask questions without fear, participate freely, communicate openly, and receive feedback that helps them to grow. It relies on a nurturing relationship between the learner and their mentors — whether teachers or parents — one that's built on trust, empathy, listening, and encouragement.

Beyond academic content, we must value emotional competence, social skills, and inter- and intrapersonal sensitivity. These are just as essential than subject knowledge in preparing our children for the realities of the world. We can see higher emphasis is placed on socio-emotional learning and mindfulness practices in the current education landscape. These are activities that will help students to regulate their emotions, improve focus, and cultivate awareness which can further empower them to be reflective and engaged learners.

As we continue to shape the future of education, let's remember that happy learning begins with emotionally healthy learners. Let's raise children who don't just know answers — but who also feel confident, connected, and inspired to keep exploring the world around them.

Too Many Choices? Making Sense of Hong Kong's International Schools

For many parents in Hong Kong, the search for an international school can feel daunting. With more than 50 schools offering different curricula — from the **IB and British system to American, Canadian and Australian programmes** — the choice is wide, but the decision is far from easy. Parents often ask: Which curriculum is right for my child? How early should we apply? What if the school we pick does not suit our child in the long run?

Adding to the challenge, demand for international school places has grown in recent years, particularly as families look for globally recognised qualifications and more holistic education. Many schools begin accepting applications between **September and November** for entry in the following academic year, and some operate waiting lists. Missing deadlines, or applying without a clear understanding of the process, can leave families with fewer options.

So how should parents decide? Beyond reputation or word of mouth, there are several key factors worth considering:

- **Curriculum fit:** Each pathway suits different learners. The **IB** develops inquiry and critical thinking across subjects. The **British system** offers structure through GCSEs and A-Levels. The **US curriculum** emphasises breadth and continuous assessment, often with the option to take **Advanced Placement (AP)** courses for university-level rigour. The **Australian system** combines strong academic standards with flexibility and co-curricular balance. Families should consider which approach best matches their child's learning style and long-term goals.

- **School culture:** Every school has its own ethos. Some focus strongly on academic achievement, while others place equal weight on creativity, sports, or pastoral care.
- **Language environment:** Although English is the medium of instruction, some schools offer bilingual or dual-language options, which may appeal to families wanting children to develop strong skills in Chinese alongside English.
- **Practicalities:** Daily commute, class sizes, and campus facilities all contribute to a child's well-being and overall school experience.
- **Future pathways:** Decisions made today will shape opportunities later, whether that means applying through **Non-JUPAS in Hong Kong** or aiming for universities overseas.

Making the right choice is rarely simple. Each child is different, and what works for one family may not suit another. This is why many parents seek professional guidance to gain clarity before making such an important decision. Families who wish to explore school options in more depth can reach **Grove Education** via WhatsApp or call **+852 2381 8013**, or email **consultation@grove-education.com**.

RSVP

Shrewsbury International School Hong Kong offers two bespoke study pathways underpinned by the academic rigour of the Early Years and Foundation Stage framework and the English National Curriculum. At the heart of the British International Pathway lies a broad and holistic curriculum that supports the development of native or near-native level English and international standard Chinese. At the heart of the Hanqing Bilingual Pathway (汉庆双语课程) lies a culturally rich curriculum that supports the development of native or near-native level Chinese and international standard English. Both options support fluid entry into secondary schools of first choice both within and beyond Hong Kong.

Join us on a campus tour to learn more about the unique distinctions of a Shrewsbury education.

Blooming Entrepreneurs of the Future

At Bloom Academy, the future of education is already in motion. Bloom is reimagining what it means to prepare students for a world in flux, where adaptability, creativity, and purpose-driven action matter more than rote knowledge or traditional metrics of success.

“Learning by doing, learning by experience, that’s where deep understanding really takes root.” At the center of this pioneering approach is Principal Renee Boey, whose vision challenges the boundaries of the classroom.

Ms Boey helped launch Bloom as Hong Kong’s first school of innovation. She believes the cornerstone of future-ready learning lies in entrepreneurship, not as a business elective but as a mindset embedded across disciplines. “Every Bloom student goes on a journey of entrepreneurship. It’s not an after-school club, it’s part of the DNA of how we learn.”

Building the Foundation

In the primary years, Bloom lays the groundwork through project-based learning and collaboration. Students take

part in Explore, Create, Share (ECS) — an interdisciplinary program connecting geography, history, social studies, art, and science. Each theme is taught bilingually, strengthening both cognitive flexibility and cultural understanding.

From early on, students practice design thinking, learning how to investigate questions, conduct research, and build context for their learning. While following UK, Chinese, and Singapore curricula, what makes Bloom distinctive is the application of these standards through real-world projects. For example, when designing a perfect home, students might research traditional architecture, explore material science, study climate impacts, and even use CAD modeling to prototype their designs.

Expanding into Entrepreneurship

This foundation grows in the secondary years. Beginning in Grade 7, all students complete a year-long course in design thinking and social entrepreneurship, exploring areas such as food and fashion innovation. They work with real companies,

design business models, and learn to pitch. From there, they move into STEAM studios to tackle solutions in specific fields, while afterschool programs and global collaborations expand their exposure.

“We’re very intentional about having entrepreneurship really integrated, not as a one-off program or after-school unit. It’s an ongoing journey that every Bloom student engages in each year,” she explained. This integration spans every subject. A math class might teach financial literacy through business modeling, while art supports product design, and languages and science feed into entrepreneurial projects with clear real-world purpose.

Partnerships and Real-World Impact

A highlight of this approach is Bloom’s partnership with Cocoon, one of Hong Kong’s leading innovation hubs. While Cocoon works with many schools, its collaboration with Bloom is unique. “Cocoon is embedding themselves in our school. They have an office here and are turning it into a future of work lab, which is so exciting, because they’re inventing something new.” Students meet entrepreneurs, innovators, NGOs, designers, and coders, seeing firsthand how ideas and technology can change the world. At Bloom, even PE, science, and language teachers embrace this entrepreneurial vision — a model that sets the school apart.

The impact is clear in student achievements. Bloom learners have collaborated with charities and businesses to design sustainability campaigns and community solutions. They have built prototypes, pitched to panels, and developed websites and social media campaigns. Some have even presented at expos, speaking directly with customers.

For many, these experiences are transformative. “If you give them experiences where professionals take them seriously... they realize they are able to do real work. That gives them confidence that impacts academics and gives them a vision of who they can be,” she said. For students who may not thrive in traditional exams, these authentic

experiences unlock hidden creativity, build resilience, and open pathways to leadership.

Global Perspectives and Core Mindsets

Bloom also collaborates internationally with partners such as the New England Innovation Academy (U.S.), the Cheung Kong Social Innovation Center (Beijing), and the DH Chen Foundation, offering students access to global mentors and perspectives on trends like AI, remote work, and social entrepreneurship.

The school’s ethos rests on three mindsets — growth, entrepreneurship, and sustainability. Students are encouraged to see mistakes as opportunities, to treat problems as possibilities for creating value, and to think long-term about the planet and society. Academic rigor is balanced with well-being. “Pastoral care isn’t an add-on, it’s a foundation. Kids can’t thrive unless they feel seen, supported, and safe,” she emphasized.

Preparing for the Future

In a world increasingly shaped by automation and AI, Bloom’s approach feels especially urgent. “AI is a powerful tool, but the human relationship is irreplaceable. AI can support creativity, but it should never replace it. Real learning still starts with human thought and curiosity.”

What sets Bloom apart is its unwavering belief in each child’s potential. Not only to succeed but to contribute meaningfully to society. “We’re not just preparing students for exams, we’re preparing them to live, to lead, to care. Education isn’t just the business of schools but the business of everyone who cares about the future.”

At Bloom, education is more than a pathway to university or a career — it is a launchpad for lives of purpose, creativity, and impact.

HKA : 25 Years of Excellence

HKA opened its iconic red doors to just three children back in 2000. A quarter of a century later they remain committed to nurturing the potential within every student. We caught up with Head of School, Kasson Bratton to talk about the year ahead.

25 years is quite a milestone, congratulations. What would you say are some of the key factors which have driven HKA's success over the years?

Thank you. We're all very proud and excited to be celebrating 25 years of HKA. Community values and partnership have always been crucial to the success of our school and over the years the mission statement has evolved with a culture of belonging at its core. Brain science tells us that by ensuring that every student feels seen, known and heard we are creating optimal conditions for learning and that is one of the reasons why a culture of belonging is so important.

Interesting. So what about the 25th anniversary, will the culture of belonging drive your celebrations?

Absolutely. All celebrations bring people together and of course we have a series of celebrations planned. On the first Saturday back to school we held our opening celebration which was made extra special as we opened Phase 2 of our courtyard garden project. Phase 1 was the installation

of a giant Playwave last summer. It's the only one of its type in Asia and our students love it! Phase 2 was the addition of an outdoor performance and seating area as well as new biodiversity and sensory gardens and a green wall.

Sounds like a great start. So beyond the celebrations will the 25th anniversary influence student learning?

That's a great question. Our key goal for the 25th anniversary is to 'drive meaningful engagement' for all community members. For our students that meant that last year we went into the classrooms and asked them what they would like to see happen during the 25th anniversary. There were so many great ideas and to help turn some of those ideas into reality we are now running a year-long project. I am one of the mentors for the group and will be working alongside other faculty and specialist staff to support the students with their plans. There are some exciting ideas in the works but I don't want to give any spoilers just yet!

Another way that students will be involved in school-wide projects this year is through our BEAM+ Existing Schools certification. Our's is a purpose-built campus which was designed and built to minimise our ecological impact. This ultimately resulted in HKA being the first whole-school campus in Hong Kong to achieve Gold BEAM+ status from the Green

Buildings Council of Hong Kong. Working towards Existing Schools certification will help us drive further improvement and enable active participation from students as they partner with our operations and facilities team to review and measure the building's sustainable features and identify our next round of innovation.

And what about the adults?

We continually look for ways to build a sense of connection throughout our community and this year we have expanded our Community Activities programme to include on and off campus sports and social events for adults. We're also reaching out to our alumni through revamped newsletters and will host an Alumni meet-up in London in late September. We also have a 1920's themed party coming up in February, and we're excited to be hosting hundreds of athletes and coaches for the SCISAC international volleyball tournament in March. It's all happening at HKA!

HKA is now taking scholarship applications for the 2026-27 school year, learn more or book a school tour at www.hkacademy.edu.hk

American School Hong Kong - Celebrating a Decade of Excellence

Located in a peaceful suburb of Tai Po, American School Hong Kong (ASHK) proudly marks a decade of educational excellence as it celebrates its 10th anniversary. Throughout these years, ASHK has been dedicated to providing a seamless, through-train international education while fostering a vibrant and inclusive community environment.

The Foundation: A Mission Realized

Established in 2016, ASHK was founded on a clear mission: to deliver an outstanding, accredited American education taught by passionate international educators. The school's core focus lies in empowering students through a holistic approach that nurtures their academic, social, emotional, and physical development. This foundational mission is powered by the wealth of knowledge and experience brought by Esol Education, a global leader with nearly five decades of expertise in K-12 education. Esol Education operates a network of ten K-12 schools and one university worldwide, providing ASHK with unparalleled resources in curriculum development, educational best practices, and a truly global perspective.

The Pillars of a Decade of Success

Over the past 10 remarkable years, several key pillars stand out as the foundation of its success:

- Rigorous American & IB Curriculum**
ASHK's commitment to a standards-based American curriculum, which culminates in the widely recognized International Baccalaureate (IB) programme, ensures students are exceptionally well-prepared for top universities in the United States, Canada, Hong Kong, and around the world. We focus on depth of understanding and fostering a curious, inquisitive mindset.
- Whole Child Approach**
Emphasizing holistic student development, the school takes a proactive stance in supporting each student academically, physically, socially, and emotionally, nurturing them into well-rounded individuals.
- Inclusive Community**
The school has built a close-knit community where a strong connection exists between students and teachers. As an all-inclusive institution, it embraces diversity and provides equal opportunities for all students to thrive.
- Dedicated Educators**
The highly qualified and passionate educators at ASHK, from diverse backgrounds worldwide, are instrumental in shaping the student experience. They serve as mentors, guides, and innovators, instilling a love for learning and pushing each student to achieve their highest potential.

Looking ahead to the next decade, ASHK envisions a future filled with continued growth, innovation, and excellence. Building upon the strong foundation laid over the past ten years, ASHK is committed to further enhancing its educational offerings, nurturing a thriving community, and empowering students to excel in an ever-evolving global landscape.

Join their 10th Anniversary Open Day

The school is inviting families to its 10th anniversary Annual Open Day. Visitors can participate in engaging activities led by experienced faculty, win prizes at game booths, receive a special gift, explore the campus, and interact with the leadership team to discover more about ASHK's academic programs and educational philosophy.

Three Education Pathways: Rooted Values and Student Success

As the 2025-2026 academic year commences, there is a great sense of joy and celebration at Christian Alliance International School (CAIS).

During the summer holiday, CAIS students excelled in international competitions and music festivals, including the school choir's debut at the Musikverein Wien where CAIS was awarded 1st Place with Outstanding Success at the prestigious Summa Cum Laude Festival. In addition, the CAIS Class of 2025 saw exceptional IB Diploma results and university acceptances. Marking the third cohort since the school's accreditation as an IB World School in 2020, the IB results this year included two students receiving the maximum score of 45 points, an average score of 37.3 points, and a 100% pass rate. Students have received offers from distinguished universities and institutions around the world.

In this new school year, leadership transitions at CAIS further strengthen its capacity to grow and build upon this success. Daniel Schick, formerly high school principal, assumes the role of Head of School of CAIS. Trained as an English teacher in Canada, Schick has taught internationally for over two decades, and in Hong Kong since 2008. He says, "Our focus at CAIS is on producing graduates who are articulate, confident, compassionate, and discerning young men and women that will effect positive change in society." He adds, "This is why we are very proud of our alumni that have become leaders in future-ready and innovative professions all around the world."

As the new Head of School, Schick emphasizes that

"From the roots to the fruits of our school, we focus on the values of wisdom, integrity, love, service, and community. These root values are nourished in a classroom learning environment that is warm and welcoming, which encourages the formation of strong relationships, a sense of belonging, and the enjoyment of learning."

CAIS offers three education pathways for students, including the Alberta (Canada) curriculum, IB Diploma Programme, and Advanced Placement courses. Together, these options provide a robust and diverse range of opportunities to meet the needs of students. Schick says, "We are very proud to offer three world-class curricula in our academic programming. The fruits are evident in our graduates who are not only accepted into top universities and programs around the world, but moreover that a graduate of CAIS is a young man or woman of integrity, equipped with a humble confidence to serve, lead, and bless society."

A Canadian-curriculum international school, CAIS was awarded the highest Tier 1 accreditation from the Alberta Education (Canada), recognizing its excellence as a leading-edge school. Through its various educational pathways, CAIS offers a Christian-based learning environment for students throughout its preparatory, lower and upper primary, and secondary sections.

ESF - A WORLD-CLASS INTERNATIONAL EDUCATION FOR YOUR CHILD

You can apply for any one of the ESF schools in Hong Kong

The English Schools Foundation (ESF) is the largest English-medium international school organisation in Hong Kong. Our 23 schools and comprehensive programme of extra-curricular activities bring out the best in every student through a personalised approach to learning and by inspiring curious minds.

There are over 18,000 students from 75 different nationalities in ESF kindergartens, primary, secondary and all-through schools. ESF is proud of the high academic and wider achievements of our students. In 2025, we have a 98% pass rate in the IB Diploma exams and 21 ESF students achieved the perfect score of 45 points in the IB DP exams.

Why Choose ESF?

• Outstanding Education

We know that, first and foremost, we are here to help your child have the best education possible. Our results speak for themselves. The education that your child will receive at every stage of their journey, from K1 to Y13, will be designed to help them discover their passions.

• Outstanding Experiences

From incredible opportunities in sports, the arts and leadership, we work hard to make sure that your child is happy, kind, and always learning.

• Outstanding People

The biggest impact on your child's education comes from their teachers. We have the world's best in our schools, led by exceptional Principals.

Join ESF for the academic year 2026/27

ESF has removed all of our zoning restrictions. No matter where you live in Hong Kong, you are free to apply for any one of the ESF schools. Our kindergartens, primary, secondary and all-through schools are all world-class. You are free to choose whichever one of these amazing places of learning that best suits your individual circumstances.

ESF also offers Kindergarten Debentures or Nomination Rights Schemes for parents who wish to gain interview priority. Secure your child's future today!

A World Class Education from K1 to Y13

At ESF, our 23 schools share the same vision —
For every student to be the best they can be.

At ESF, we help our students achieve the extraordinary. We do this by holding on to a single truth: that every student is unique, that every child has their own talents, their own skills and their own passions. With our vast resources, wonderful teachers and network of 22 schools, we are able to provide a truly exceptional learning experience.

For parents who are looking to have their child join ESF in 2026/27, applications for K1 (born 2023), Year 1 (born 2021) & Year 7 (born 2015), will be open from 1 to 30 September 2025. Don't miss it!

Parents who wish to gain interview priority may apply for ESF's **Kindergarten Debentures** or **Nomination Rights Schemes**.

How CAPCL is vaccinating young minds against adversity

At Christian Alliance P.C. Lau Memorial International School (CAPCL), positivity is deeply rooted in its educational strategy. Just as children are inoculated against physical diseases at a young age, their emotional immunity can be strengthened through the cultivation of positive thinking.

Vivid and inspirational, this analogy was shared by Dr Cora Hui, Head of School, in a recent interview with The Standard, which brings out the school's commitment to equipping its students with not only knowledge but also the emotional resilience developed through instilling positive thinking and habits early in life.

By nurturing positive habits of thought, language and behaviour from an early age, Dr Hui believes children can grow into adults who not just survive but thrive when faced with adversity.

This mindset forms the foundation of CAPCL's educational philosophy, anchored in the PERMA framework – Positive Emotion, Engagement, Relationships, Meaning (through community service) and Accomplishment. It is an approach that blends rigorous academic pursuit with social-emotional growth, guided by the school's Christian values.

From theory to practice: the “Strength Gym”

One of the school's most imaginative PERMA-based initiatives is what Dr Hui calls the "Strength Gym". Unlike traditional education models that focus on correcting deficiencies, pupils are encouraged to focus on their strengths while staying motivated to improve what they are less competent at.

She explained: "Instead of dwelling on what children aren't good at, we train them to recognise and develop what they excel at. This reframing is critical in rewiring the brain to be optimistic."

Rooted in the science of neuroplasticity, this initiative is

designed to overcome what psychologists term the “negativity bias” – our natural tendency to focus on the bad rather than the good.

At CAPCL, young learners are taught to consciously revisit joyful memories and to articulate these stories as part of their bilingual learning experience.

"Every time a child retells a positive experience, it becomes further ingrained in their psyche. The practice fosters confidence, emotional regulation and expressive language skills," said Dr Hui.

Language of praise and self-belief

Praise, too, comes through strongly in CAPCL's classrooms. Teachers are trained not merely to applaud achievements but to recognise qualities such as perseverance, courage, kindness and character.

"Children are naturally motivated to seek approval. When we acknowledge their positive behaviours and character traits, they strive to repeat them," she said.

The school also employs the ABC model of explanatory thinking: A for the activating event, B for belief and C for consequence. Students learn that while they may not have control over what happens, they can control how they interpret them. This mindset helps CAPCL equip its pupils to bounce back from setbacks with a sense of agency.

In addition, CAPCL staff and students practise a daily “WWW” exercise – short for “What Went Well” – a simple, time-efficient gratitude ritual designed to rewire the brain towards positivity and release feel-good neurochemicals like dopamine.

Meditation in motion

Another unique element of CAPCL's well-being curriculum is the use of moving meditations, which are gentle physical activities designed to help pupils pause, reflect and regulate their emotions.

"Meditation doesn't have to be seated or silent. Even a short walk or purposeful movement can help children calm down, centre and respond constructively rather than reactively."

Such activities, alongside regular chapel gatherings, foster a predictable routine that helps students feel safe and grounded. This rhythm is key, she said, to reducing anxiety and enhancing readiness to learn.

Bringing parents along the journey

In Hong Kong where academic pressure often begins early, shifting or reshaping parental mindsets can be a challenge. Yet Dr Hui sees this as an integral part of CAPCL's mission.

"From the moment a family joins our school, we're transparent about our approach. We're not an exam-driven institution. We focus on nurturing well-rounded individuals."

To help ensure school and home stay on the same page, CAPCL hosts three parent engagement sessions each month and sends weekly e-notices. Parents are also invited to take part in chapel services, classroom observations, and discussion forums.

Such initiatives are inclusive of the school's growing international community. "It's a human one. Every culture values joy, purpose, connection and accomplishment," she said, further explaining that many parents don't just need strategies but seek emotional solidarity. "They already know what to do, but they need to feel seen. Just knowing another parent faces the same challenges can be a relief."

A bilingual bridge to the co-homeroom teaching model

The school's commitment to developing articulate, self-aware learners is reinforced further by its bilingual co-homeroom teaching model (65% English, 35% Mandarin). Pupils are encouraged to recount their experiences in both languages, helping them make emotional and linguistic connections.

"Storytelling, especially about one's own joyful moments, is a powerful cognitive and emotional tool. It enhances language acquisition and personal identity."

This approach strikes a chord with many expat families, who often find that CAPCL's blend of faith-based values,

bilingual fluency and whole-person education prepares their children for success in global academia while guiding them towards purposeful, fulfilling lives.

Building resilience through STREAM

PERMA principles are also integrated into the school's STREAM curriculum (Science, Technology, Reading, Engineering, Arts and Mathematics). Dr Hui pointed out that positive emotional states improve attention, memory and creativity, all essential for success in interdisciplinary learning.

"When students feel safe and valued, they are more open to new ideas and more likely to persevere through challenging projects." That's why every STREAM activity, from design thinking to problem-solving, is underpinned by a PERMA lens.

Teaching children to reframe failure – from “I am stupid” to “I made a poor choice but can do better” – can also become a life-long cognitive toolkit that protects them against self-doubt and despair, Dr Hui added.

Perhaps most poignantly, students are given daily challenges to perform simple acts of kindness, from offering compliments to classmates to tidying communal spaces. These small gestures create a ripple effect of positivity throughout the campus.

A vision of lasting impact

As CAPCL looks forward to another academic year with PERMA as its guiding principles, Dr Hui remains confident in its transformative potential.

"We're cultivating children who know how to face life with hope, humanity and heart. You may not see the fruit of a seed you plant today, but if you water it with care, one day it becomes a tree that gives shade to others," she said.

And just like that, a new generation gains more than an education; they gain a shield against life's challenges. With each lesson rooted in positivity and purpose, CAPCL prepares its students to face the world with confidence and resilience.

Shaping Tomorrow’s Leaders: Stamford American School Hong Kong Unleashes Student Potential

Since opening its doors in 2017, Stamford American School Hong Kong has been a pioneer in education, constantly evolving with global trends and using progressive resources to support each student’s growth. This fall, the school celebrates a significant milestone with the launch of its new West Kowloon campus alongside ongoing curriculum innovations like the Cornerstones program. With a focus on personalized graduation pathways and future-ready learning, Stamford is committed to helping students discover their passions and thrive in a fast-changing world.

New West Kowloon Campus: Commitment to Future-Focused Education

In its ninth year, Stamford’s Head of School, Andrew Noakes, proudly unveils the new high school campus in West Kowloon’s vibrant Olympic district. Built for senior students and dedicated to the International Baccalaureate Diploma Program (IBDP), the campus features state-of-the-art facilities that complement Stamford’s seamless Pre-primary to Grade 12 education.

Designed to rethink traditional classrooms, the West Kowloon campus offers flexible learning spaces, modern

science labs, arts and performance studios, and advanced design technology workshops. These facilities inspire students to collaborate across disciplines, build creative confidence, and sharpen leadership and problem-solving skills from an early age.

“Our West Kowloon campus is more than growth—it embodies our commitment to future-focused education,” Andrew Noakes said. “Together with our Ho Man Tin campus serving Pre-primary to Grade 8, we nurture confident, globally-minded lifelong learners.”

Personalized Pathways: Where Passions Take Flight

At Stamford, learning is tailored to each student. The STEMinn program, starting from age five, fosters innovation by integrating STEM and creative disciplines into daily life. Students test ideas across subjects and present their learning creatively. For example, Trevor, Class of 2025, found his passion for engineering through coding a drone project in Grade 10. He will pursue mechanical engineering at HKUST, turning his school interests into a career.

High school students also benefit from broad subject choices and real-world experiences through the Cornerstones program (Grades 9-10). This initiative helps students explore careers and build skills. Merrick from the Class of 2024 credits Cornerstones for launching his journey into architecture, now studying the field in Australia.

Celebrating the Success of the Class of 2025

The Class of 2025 shines with an average IB score of 35, surpassing the global average. Exceptional achievements include a top score of 44 points and 24% of students earning the Bilingual Diploma.

This graduating group received over 200 university offers from over 100 institutions in ten countries. Notably, 25% secured spots at top 100 QS World Universities, including Imperial College London, University College London, University

Trevor, Class of 2025, will pursue a mechanical engineering degree at HKUST

of Melbourne, University of Hong Kong, University of Sydney, University of Toronto, University of Edinburgh, Chinese University of Hong Kong, Monash University, University of British Columbia, King’s College London, and HKUST.

At Stamford American School Hong Kong, every student is empowered to shape their future, backed by a community that values ambition, diversity, and excellence. As the school enters its next chapter, its dedication to unlocking every learner’s full potential remains as strong as ever. Admissions for the 2026-27 academic year are now open. Apply now to be the next future leader.

Discover the Transformative Education at Malvern College Hong Kong

Malvern College Hong Kong (MCHK) is an esteemed IB World School offering a comprehensive educational experience through the Primary Years Programme (PYP), Middle Years Programme (MYP), and Diploma Programme (DP) for its diverse pupil body. Located on a state-of-the-art campus in Pak Shek Kok, New Territories, it caters to children aged 5-18 years old. Additionally, Malvern College Pre-School Hong Kong provides high-quality early years education for children aged 2-5 years old, with two campuses: Coronation Circle in West Kowloon and Island West in Sai Ying Pun. Both schools embody the rich heritage of Malvern College UK, a prestigious co-educational day and boarding school founded in 1865.

Academic Excellence

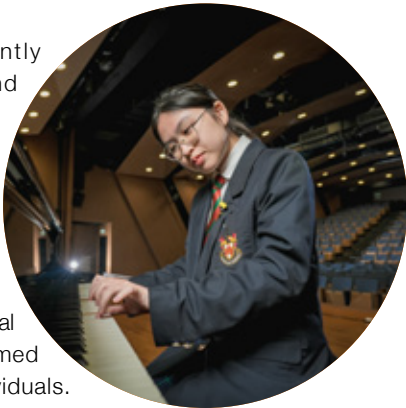

The Class of 2025 in the IB Diploma Programme achieved outstanding results. One student earned a perfect score of 45 out of 45, while two scored 44 and two others earned 43. Over one-third of the cohort achieved 40 points or higher, reflecting exceptional dedication and academic achievement.

28% of students received the bilingual diploma, showcasing a strong commitment to language proficiency. The pupils demonstrated remarkable performance across various subjects, achieving an average of over 6 points in Design Technology, Music, Physics, and Geography. More than 70% of students earned two or more bonus points through core components like Theory of Knowledge and the Extended Essay.

MCHK graduates consistently achieve outstanding results and receive offers from leading universities around the world, spanning multiple continents and prestigious institutions.

British-Style Pastoral Care and Holistic Education

MCHK offers British-style pastoral care and a holistic education aimed at developing well-rounded individuals.

Headmaster Paul Wickes highlights the strong ties with Malvern College UK, as well as the wider Malvern Family of Schools - including Chengdu, Qingdao, Tokyo, and Egypt - facilitating collaboration and global opportunities for students to connect and grow beyond the classroom. "Malvern pupils enjoy the full benefits of being part of this global family, with opportunities to connect, collaborate, and expand their horizons."

The school's House system fosters a sense of community and belonging, supported by Housemasters and Housemistresses. MCHK emphasises eleven key qualities such as open-mindedness, ambition, and self-awareness, ensuring students are prepared not only academically but also for success in life. This approach nurtures character, resilience, and leadership alongside academic achievement.

Signature Programme

The Signature Programme at Malvern College Hong Kong is designed to challenge and inspire pupils through immersive, experiential learning opportunities. Built around six pillars - Internationalism, STEAM, Sustainability, Adventure, Leadership, and Service - it aims to develop empathetic, globally-minded leaders. The programme is enriched through Enhanced Learning, incorporating innovative teaching methods; Experiential Education, with real-world, hands-on experiences; Outdoor Learning, utilising outdoor environments; and a strong Global Network connecting

pupils worldwide. Initiatives such as interdisciplinary trips, the Student Council, Round Square Committee, student-led CCAs, MUN Programme, Malvern Mingle, Harvard Model Congress for Young Leadership, and collaborative research with NGOs enable pupils to address real-world challenges while developing essential skills. Rooted in Round Square values, the IB Learner Profile, and Malvern Qualities, the programme fosters transformative leadership and meaningful community service.

Join the Malvern Family

Malvern College Hong Kong combines academic excellence with outdoor exploration, service learning, and experiential education to develop compassionate, resilient, and well-rounded individuals. Its educational philosophy extends beyond exam preparation, aiming to cultivate leaders capable of making significant societal contributions. Families are invited to become part of this journey of discovery, supported by a rich tradition of holistic education and excellence.

Introducing the Hanqing Bilingual Pathway: A World-Class Bilingual Education

Shrewsbury International School Hong Kong celebrates the launch of the Hanqing Bilingual Pathway (HQP). This ambitious, bespoke, and culturally rich programme is designed to offer an exceptional educational experience for young learners.

The Hanqing Bilingual Pathway (HQP) aims to expand linguistic and cultural learning experiences while supporting the advanced development of literacy skills in both Chinese and English. This unique approach is led by an outstanding team of native linguists, ensuring that students receive the best possible instruction. In addition to a balanced curriculum that includes specialist instruction in Music, Physical Education, and Aquatics, students will also benefit from sector-leading school-selection guidance.

“Underpinned by the academic rigour of the Early Years and Foundation Stage framework and the English National Curriculum, HQP students will develop native or near-native level Chinese and international standard English. Their academic strengths will ensure advantaged placement at all of the leading schools in Hong Kong and beyond.” — Sophie Che, HQP Chinese Principal

“At Shrewsbury International School Hong Kong, the Hanqing Bilingual Pathway enhances cognitive abilities and language proficiency, fostering character growth and problem-solving skills. Our dual pathway approach offers a world-class education, blending the best of English National Curriculum and Chinese National Curriculum.” — Dr Lu, HQP Curriculum Director

Curriculum Highlights

The HQP curriculum features several key elements that set it apart:

- **Bilingual Integration:** A 50-50 daily balance of English and Chinese instruction, including Chinese Mathematics as part of the curriculum.
- **Cultural Cultivation:** Students will engage in rich linguistic and cultural experiences that bridge Chinese and Western cultures.
- **Academically Rigorous:** The curriculum is based on the UK Early Years framework and the English National Curriculum, blending the best of English National Curriculum and Chinese National Curriculum, ensuring a high standard of education.
- **Legacy of Success:** Inspired by over 470 years of Shrewsbury heritage, the programme draws upon a wealth of experience and tradition.

Commitment to Excellence

“The introduction of HQP, our tailored dual language programme showcases our ongoing dedication to innovation, collaboration, and excellence. Guided by a shared vision with our families, Shrewsbury International School Hong Kong continues to expand its exceptional offerings, providing diverse opportunities that prepare our students to thrive in a global community. We build confidently on the strong foundations laid here in Hong Kong and the enduring legacy of Shrewsbury School UK, established by Royal Charter in 1552.” Priya Kanthan, Shrewsbury Principal

At Shrewsbury International School Hong Kong, we believe in Inspiring Exceptional People, Outstanding Opportunities, and Academic Excellence. The Hanqing Bilingual Pathway is not merely an educational programme; it is a holistic approach to nurturing confident, articulate, and independent learners.

Choosing the Hanqing Bilingual Pathway, you are investing in your child's future, providing them with the tools they need to succeed in an increasingly interconnected world.

For more information about the Hanqing Bilingual Pathway and to learn how your child can be part of this exceptional educational experience, please register for our Campus Tour. You will have the opportunity to meet our Principals, and children are also welcome to participate in our Taster Session alongside their parents. For details, please contact our admissions team at admissions@shrewsbury.edu.hk. Experience the difference that a world-class bilingual education can make!

Celebrating 5 Years of Achievement at

Invictus School: Nurturing Tomorrow's Leaders

Our School

Celebrate with us as Invictus School Hong Kong has approached its fifth academic year since establishment, continuing to uphold its commitment to providing high-quality and accessible education. At Invictus, we strive to foster individuals in innovative and inspiring ways, nurturing them to become lifelong learners who contribute positively to society. Our modern Tseung Kwan O campus houses the kindergarten and primary years (Nursery to Year 6), offering a bilingual programme in English and Mandarin Chinese. For students in Years 7 to 13, our secondary school campus in Chai Wan delivers the prestigious Cambridge Curriculum, including IGCSEs and A-Levels. Together, our two campuses work towards one goal in our school culture.

Our Mission

“Our mission at Invictus is to nurture our students to be future-ready and enable them to skillfully navigate the Volatile, Uncertain, Complex and Ambiguous (VUCA) world that we live in today,” says Julia Woo, Head of Schools. “To this end, strong instructional and curriculum leadership and sound assessment is key to empower students to not only thrive in the classroom, but also skillfully navigate an uncertain and changing world today.” Beyond equipping students with the skills, knowledge and competence to enable them to succeed, Invictus students will also be grounded in values such as commitment, aspiration, resilience, and empathy, ensuring they grow into fine young men and women of good character.

Our Curriculum

Education at Invictus is structured around a challenging curriculum that progresses seamlessly from kindergarten to secondary years. Beginning with the Cambridge Early Years in kindergarten, incorporating the Singapore Mathematics programme and bilingual learning, our students transition to the primary section where they build on these foundations. The Cambridge Primary Curriculum provides an international framework, with a continued emphasis on Singapore Mathematics and bilingual education, gradually shifting focus to English during the primary years. In secondary, students explore a core foundation of subjects in Years 7 to 9, followed by the Cambridge IGCSE program in Years 10 and 11, offering flexibility in subject choices and personal strengths. The final step of the Invictus journey is the AS and A-Level programs in Years 12 and 13. These Cambridge qualifications are world-renowned, unlocking pathways to top-tier universities worldwide.

Our Value-Proposition

Invictus School Hong Kong is a through school, where a child who joins Invictus at the kindergarten or primary levels, is guaranteed a place in the primary and secondary sections. The initial application for any year level is made online. We welcome both local and international families with accessible international school fees and provide support to facilitate the smooth integration of students from diverse educational backgrounds.

Connect With Us

Prospective parents and students eager to learn more about Invictus are encouraged to visit the school and engage with our admissions team. Experience our campus through tours to get a glimpse of the school environment before enrollment. Contact us to secure your spot and begin your journey with Invictus.

Affordable Excellence: Why KIS Stands Out as the Top Choice for Quality International Education

Korean International School (KIS) has been successfully running for over 30 years in Hong Kong, providing students with an excellent standard of education and a well-rounded learning experience.

Since its establishment in 1994, KIS has been committed to providing a first-class education to students from diverse backgrounds. The school has a strong reputation for academic excellence, with students consistently achieving outstanding results in external exams such as the International General Certificate of Secondary Education (IGCSE) and Cambridge International AS & A Levels.

KIS prides itself on providing a student-focused education that values individuality, creativity, and critical thinking. The school's dedicated faculty is composed of experienced and highly qualified teachers who are committed to providing a supportive and nurturing learning environment for all students.

One of the unique aspects of KIS is its commitment to bilingual education. The school offers Korean, Chinese, and Spanish language programs for students, as well as Chinese language classes for those who wish to study Mandarin or Cantonese. This approach allows students to develop their language skills and cultural understanding, which is essential in today's globalised world.

The school's facilities include modern classrooms, science labs, a library, an art studio, a performing arts center, and many sport facilities. The campus, located in the Sai Wan Ho area of Hong Kong, provides a peaceful and conducive environment for learning. Recognising the importance of extracurricular activities in a student's overall development, KIS offers a wide range of options, including sports, music, drama, and community service. The diverse student body enriches cultural exchange and offers students a global perspective.

Moreover, KIS offers competitive school fees, making it an affordable international school option for both local and international families seeking quality education.

KIS is committed to providing a safe and inclusive learning environment for all students. The school's policies and practices promote diversity, respect, and understanding, ensuring that every student feels valued and supported.

Reggio Inspired Play at Fairchild

The Reggio Emilia inspired approach is in full swing at both our Fairchild campuses! We have our playgroup, Fairchild Junior Academy, conveniently located in Tin Hau, with stunning views of Victoria Park and the surrounding areas, welcoming the younger learners, aged 8 months up to aged 6. Our nursery and kindergarten, Fairchild Kindergarten, is situated in Sai Yin Pun, very close to Kennedy Town, welcoming children aged 2 - 6 years.

The start of the term has seen our children dive into inquiries "All About Me" and it's been wonderful to see the children explore engaging hands-on activities. Our K2 children recently created self-portraits using air-dry clay, and perfectly matched the colours of their hair and clothing in their creations. The excitement during this engaging fine motor activity was wonderful to see. As children enjoyed the creative process, they were also engaging in lively conversation and observations, helping each other to identify their own features, as well as those of their friends - learning and discovery all at the same time is part of our learning process and an important part of learning through play. Their completed masterpieces are a great reflection of the children's growing sense of self-awareness, as well as showcasing their creativity.

Our K1 children have been reflecting on their family photos in the classroom. They are so excited to tell their friends about their families and in doing so, they practice their language skills while strengthening their social interactions. This is the core of school life - building strong relationships through daily

communication and engagements, something our children have ample opportunity to do every day at school. As they share all about their own families, the children become more aware of themselves, developing their cognition, social and emotional skills too!

Not to be outdone, our pre-nursery children aged between 2 - 3 years of age, painted their names in their favourite colours, getting messy and covered in paint is all part of that creative process! Together with the many wet and dry sensory activities, the children explore a new world of many sensory experiences, which may even include our resident turtles, frog, hamster or gecko! Call us today for a school visit and experience our beautiful school settings, both provide a welcoming oasis for playful learning and development on Hong Kong island.

Maple Bear Hong Kong: Shaping Future Leaders Through Canada's Premier Bilingual Education Model

Maple Bear Canadian International Kindergarten delivers the best of Canadian bilingual education to prepare students for a lifetime of success. With over 480 schools across 37 countries, Maple Bear is now the largest early childhood provider globally, providing high-quality programs designed to equip students for the future.

Maple Bear HK has operated since 2019, offering programs for children aged 4 months to 6 years. Our four schools in Tseung Kwan O, Yau Tong, and Lohas Park reflect our commitment to nurturing young minds in Hong Kong for the global stage. All our teachers are fully qualified and receive continuous professional development in the latest pedagogies to ensure students receive the best education during their crucial developmental stages.

Play is fundamental to a child's holistic development. At Maple Bear, we emphasize its value in promoting interaction, discovery, and making sense of the world, allowing learning to happen naturally. We immerse young learners in a bilingual English and Mandarin curriculum using a student-centered approach rooted in Canadian best practices. This early immersion offers significant cognitive and linguistic benefits, supporting

physical, intellectual, emotional, and social growth. This activity-driven, play-based approach encourages students to take risks and explore through trial and error. "With gentle care, we support and develop their young minds to be ready for the world," says Ms. Julie Chu, Principal at Maple Bear Hong Kong.

Maple Bear teachers receive ongoing professional development and mentorship from Canadian educators to ensure instructional excellence throughout the academic year. "The Maple Bear program is meticulously designed and regularly updated by our team of over 150 experienced early childhood education experts from Canada," says José Henrique Melo Del Castillo, CEO of Maple Bear Global Schools.

We also offer Bear Care English and Mandarin playgroups for toddlers aged 12-24 months, which bridge directly into our Kindergarten classes to build confidence and ensure a smooth transition.

Applications for PN to K3 for the 2026/2027 school year are now open.

Embracing Nature, Nurturing Minds and Engaging our Community: The Spirit of NIS

Norwegian International School (NIS) is a school like no other in Hong Kong. It's a school where you'll find wide open spaces, lush greenery, and students who love to spend time learning both in and out of doors. It's a school where the students, families, and staff truly are a learning community together.

At NIS, both the Primary School and Kindergarten campuses seamlessly blend classroom learning with outdoor exploration. The school's unique location in Tai Po provides a rich learning environment where students can observe the world around them in the classroom and then venture outdoors to witness the growth of vegetables they've planted or marvel at the ancient trees that grace the playground.

Learning at NIS is based on the International Primary Curriculum and International Early Years Curriculum. Both are enquiry-based programmes that use creative, thematic units to demonstrate how different subjects relate to each other. NIS School Principal Luis Mak says of these units, "Our students can learn about subjects through different lenses—so, for example, we view the topic from a scientist's perspective, an artist's perspective, and a historian's perspective."

An active, healthy lifestyle is vital to a child's development, and at NIS, it's an essential part of daily life. The primary campus' large outdoor playing field has encouraged students to love to be physically active for the simple enjoyment of it. When the time comes to return to the classroom, NIS students benefit from all the positive effects sunshine and activity have on their developing intellects.

In addition, at NIS, community involvement is not just encouraged; it's celebrated. Parents have ample opportunities to participate in classroom activities, and it's common to see families enjoying quality time together in the school playground long after the school day has ended. As part of Generations Christian Education, NIS also provides parent education opportunities to strengthen families and support learning at home.

NIS offers regular school tours and would be delighted

to introduce all interested families to this vibrant, close-knit community.

Discover Oxbridge School Hong Kong: Where Happy Students Thrive on a Cambridge Pathway

Oxbridge School is a registered Primary and Secondary school that provides an exceptional British-based education within a vibrant and supportive community. We are proud to be an accredited Cambridge International School, offering a seamless and prestigious educational pathway from Year 1 through to IGCSE and A-Level examinations, preparing students for success at top universities worldwide.

Central to our ethos is the belief that a happy student is a successful student. Our school is filled with happy, engaged, and confident children who are empowered to explore their passions and build lifelong friendships. We foster a nurturing and positive environment where well-being is paramount, ensuring that each child feels valued, supported, and inspired to achieve their personal best.

This personalised attention is made possible by our exceptional teaching team, who bring an average of over 20 years of experience to the classroom. Their dedication and expertise are fundamental in guiding each student to unlock their full potential, both academically and personally.

At the heart of our academic excellence is the internationally respected Cambridge curriculum, delivered through small class sizes. This deliberate approach allows our dedicated teachers to provide highly personalised learning, tailoring their methods to meet individual needs and aspirations. Our forward-thinking education goes beyond traditional academics, cultivating critical thinking, creativity, and a genuine love for learning that extends from the core subjects to arts, sports, enrichment and extracurricular activities.

A Small School With a Big Heart

YMCA Christian Academy (YCA) is a unique community-oriented private primary school on Hong Kong Island offering a vibrant, future-ready curriculum. "We are blessed with a connected community, amazing parents and student body. The majority of our new students join YCA through parent referrals" says Geoff Blaik, Principal. Accredited by the Council of International Schools (CIS), it represents our high standards in our international education and commitment to continuous improvements in providing children with an outstanding and future-focused education.

Following the International Primary Curriculum (IPC) and UK National Curriculum, students engage in thematic and creative units that provide a structured learning process along with specific educational objectives for each subject. These units are designed to capture students' interest and foster learner agency, equipping them with the skills to take charge of their own educational journey. Students learn how to be agents, taking ownership of their learning and development, maintaining a curious and reflective posture. We

focus on the development of the whole child so that every student will grow and thrive academically, physically, spiritually, and socially. For this to happen, we maintain a nurturing learning environment and offer a range of support for students' wellbeing and pastoral care.

Wellbeing Curriculum & Pastoral Care Matters

We offer a holistic, child-centred approach. Using the best of both the Jigsaw PSHE programme (UK) and Positive Education Enhanced Curriculum (Australia), we help students develop the knowledge, skills, and attributes they need to thrive as an individual, a family member, and as part of the wider community. "Children who can understand and manage their emotions are more likely to express themselves calmly and in an appropriate way," says Mr. Blaik. Wellbeing-focused teaching aims to help students understand themselves as learners and to develop self-awareness and personal, social and emotional skills. Our students are able to identify their emotions and use strategies to help them regulate and solve problems together.

Importance of an Inclusive School

YCA recognises that every student is unique. The school's inclusive ethos ensures that no student feels alone or defeated for needing support. YCA actively creates opportunities for peer group interventions, where students with similar needs can support each other. Open communication is encouraged, so students feel safe to ask for assistance without fear of judgment. We do not force inclusion at our school, but it is done through mutual respect and understanding between students as well as with teachers and staff.

Connect with Us

YCA is currently accepting applications for Year 1 to Year 5 for the current academic year. Families who are interested in applying for 2026-27, applications will open on 1 September to 31 October. We would like to invite you to come see the school in action at our upcoming Open Day on 27 September 2025. You will have the opportunity to meet our student ambassadors, the Senior Leadership Team, and our teachers, and to discover why YCA is an exceptional environment for children to thrive.

TESTIMONIALS

"LEC's rich experience and excellent work ethic certainly makes them a reliable college consultant who can support students through the entire US application process. Without their guidance, I would not be able to obtain college offers from Princeton, UPenn and Berkeley. They also helped me achieve a predicted 7 in IB English Literature.

Thank you very much for your effort, LEC"

PRINCETON UNIVERSITY,
CLASS OF 2024

"We were in a bit of a hurry when I applied to LPCUWC. Luckily, I had the assistance of LEC teachers! They were very professional, hardworking, and even gave up their holiday on Chinese New Year to patiently teach me how to utilise literature to represent my unique traits and characteristics. They also taught me how to be more confident in a serious setting in an interview, I was able to learn a lot from them."
