The basic unit of the Chinese language is the zi (字), i.e., a Chinese word. Each zi has a written form (called a character, made up of strokes), a sound (made up of consonant and vowel) and a meaning (or multiple meanings). When we speak or write Chinese, we string zi together to form terms, phrases and sentences.

In Putonghua (the spoken form of Modern Standard Chinese) each zi is pronounced in one of four tones:

1st tone: 1 = diacritical mark — pitch: 5 to 5, highest prolonged
2nd tone: 2 = diacritical mark / pitch: 3 to 5, middle to high
3rd tone: 3 = diacritical mark U pitch: 2 to 1 to 4, low to lowest to high
4th tone: 4 = diacritical mark \ pitch: 5 to 1, highest to lowest

To pronounce each zi below, follow its pinyin and the given tone number. Light-sound words, which have no definite pitch, carry no diacritical mark and are marked by 0.

This week: Words about bio-chemical weapons

毒販 (du2 fan4 = poisonous-drugs-traffickers) sell 毒品 (du2 pin3 = poisonous-things = poisonous drugs). 吸毒 (xi1 du2 = inhaling/taking-drugs) 毒害 (du2 hai4 = poisons-harms) nervous system.
